EXPO CONFERENCE

roofs | insulations | façades

ARCHITECTURE

WELCOME

Part of the international expo conferences organized this year in Warsaw, Budapest and Bucharest, this edition brings together recently awarded architects, creators of spectacular projects, who, this year, have drawn the attention of the international mass-media this year. RIFF 2015 program highlights universal iconic buildings, awarded at the most recent editions of the European and national architecture competitions, completed by modern technologies that serve architecture, used by the greatest architects in the world, available on the Polish market as well.

Networking

Impressive architectural façades, creative ways of rethinking the built space, energy-efficient buildings, thermal insulation materials, new urban spaces presented through the projects included in RIFF 2015 program depict an architectural universe without compromises.

business inspiration

The concept of RIFF conferences is centered on the architect and on promoting good practice examples of the European architecture.

RIFF International Architecture Expo Conference dedicated to roofs, insulations, and façades is part of the architecture conferences organized in Warsaw by ABplus Events with the following themes: glass in architecture (INGLASS), interior architecture and design (GIS), landscape architecture (LAUD). The previous three conferences reunited over 500 architects from all regions of Poland and over 30 international speakers, out of a total of over 60 speakers.

We are delighted to invite you to join us for eight hours of inspirations, networking and business, in the company of the elite of architects from Poland, U.K., Norway, Israel, Turkey, and Germany, as well in company of the guests from all over Poland.

Lukasz PLATKOWSKI

Chairman at RIFF Warsaw 2015 conference

Principal, ARB Firmwide Practice
Area Leader for Tall Buildings,
Gensler, UK

Presentation:

**“Inside-out design.
Architecture driven
by the end user.”**

As a firmwide Tall Buildings Practice Area Leader and Regional Design Leader for EMEA region, Lukasz Platkowski has a wide range of experience designing large scale commercial, residential and public spaces.

He is a visiting tutor at the Nottingham University School of Built Environment, contributes to BCO CTBUH Strategic Guidelines and sits at numerous jury panels, including “World Architectural News” Commercial Office Awards and LEAF Awards, two prestigious competitions on architecture.

Lukasz Platkowski chairs RIFF conference and reveals some of his latest projects in a presentation entitled **“Inside-out design. Architecture driven by the end user”**.

Since joining Gensler in 1999, the architect has been involved in a variety of international & multicultural projects actively engaging in all stages of development from concept design to delivery. He is leading a number of projects in the UK, Europe and Middle East that are changing industry standards and redefining what constitutes “world-class” design.
